Projects

Smart Brain (Face Detection App)

Technologies used: React.js, Node.js, Express.js, PostgreSQL, Clarifai API

· A fully functional full stack application that can locate faces in a provided input.
· Utilized the Clarifai API which can automatically recognize faces from any angle.
· Maintains registered users and registers new users.
· Implemented a database that manages and keeps track of how many entries a user has made.

Guess The Flag (Game)

Technologies used: React.js, Material-UI

· Developed and designed a fun little game where you guess the flags that you see.
· Created for my little brother who loves geography.
· Helped me acquire practice and knowledge on react hooks.

Personal Portfolio

Technologies used: HTML, CSS, Bootstrap, JavaScript

· A portfolio to showcase my technical and design skills.
· One-page layout portfolio with modern user interface.
· Fully responsive with reveal animations initialized using the AOS library.

Skills

HTML5 | CSS3 | SCSS/SASS | Bootstrap | JavaScript | React.js + Hooks | Material-UI | Git

Education

Altinbas University - Istanbul, TR

BSc in Computer Engineering   *Graduation Date: January 2023*

Experience

SOFTWARE ENGINEERING VIRTUAL INTERNSHIP | JPMORGAN CHASE&CO. | MARCH 2022

· Used JPMorgan Chase frameworks and tools and implemented the Perspective open-source code in preparation for data visualization.
· Operated Perspective to create a chart for the trader's dashboard to display data visually for traders.
· Applied my technical skills to a hypothetical request from the firm's trading floor to analyze and visualize data
